

Specialists in **Animal Health & Nutrition** | Celebrating over 40 years

Product Guide 2016/17

The Denis Brinicombe Group have brought "nutritional engineering" to animal health products since 1973, benefiting livestock throughout the UK and across the globe. Our business has undergone many changes over the years, but we have remained a family owned operation, dedicated to creating new and innovative products to help farmers ensure a healthy and profitable livestock enterprise.

DBrinicombe

Livestock Health

Healthy animals are content and perform to their genetic potential. Our formulated range of health products are devised to overcome specific animal health issues. Each product is a carefully blended mix of targeted ingredients aimed to reduce the economic impact on the enterprise.

Nutritional Feed

Production relies on a balance of energy, protein and micronutrients. Our feed ranges are designed to balance and buffer shortages of these crucial nutrients, through free access or mixed in rations. These ranges not only provide a concentrated source of required nutrients but improve feed efficiency by utilising the full ration.

Mineral Balance

Our mineral products provide farmers with the opportunity to effectively balance their micronutrient shortfalls. This allows the animal to function at their optimum potential, to benefit the whole livestock enterprise.

Crop Preservatives

Our range of acids and inoculants target the nutritional qualities in forages and grain. This ensures a preservation in nutrients and reduction in waste, while enhancing the animals ability to best optimise the feed for production.

Tubby

Our Tubbys' use the unique method of the chemotaxis motion. Unlike other blocks and buckets, animals only take Tubby until their optimal requirement is reached. The concentrated composition of the Tubby allows the animal to achieve the targeted outcome through low intakes.

Sheep

Tub Sheep

Covering ewes and lambs at maintenance

Tub Sheeps Feet

Targeting hoof integrity

FroBut & FroBut Plus

Support for healthy skincare & appearance around the mouth & nose

Coxi-Clear Ewe

Pre-lambing coccidiosis control, with a prescribed level of Decoquinat

Coxi-Clear Lamb

3 variations of coccidiosis control, targeting risks for lambs

Bug-A-Tub

Reduces parasitic attack and irritation

Tub High Mag Sheep

Aiding the prevention of grass staggers

Tub Ram

Complete nutrition for all ages of ram

Tubbing Tubby

Optimising fertility in ewes

Super Tup

Fertility aid for a tighter or earlier lambing

Tub Toxo

Toxoplasmosis prevention aid for pregnant ewes

Tub Twin Lamb

Aid to twin lamb disease prevention

Tub Pre & Post Lambing

Easier, faster lambing & vigorous lambs

Tub Easi-Life

Preparing the ewe to nurture the lamb

Tub Lamb Finisher

Promoting a fast finish for all lambs

Tub Ron

Specialised for Ronaldsay sheep, formulated to reduce copper toxicity

Organic Simply Green Range

Suitable for all stock, containing seaweed for a source of natural micronutrients

Tub Simply Green

Maintenance coverage at grazing

Tub Simply Green Fly

Coverage at grazing with added garlic for summer conditions

Tub Simply Green Mag

High magnesium, aiding the prevention of grass staggers

Cattle

Tub Cattle Conditioning

Improving cattle condition, production & appearance

Tub Cattle Protected

Promotes first time inseminations

Tub High Mag Cattle

Aiding the prevention of grass staggers

Tub Fly

Reduces fly nuisance and irritation in cattle

Tub Quick Serve

Tighter calving for breeding cows & improved conception rates

Tub Easi-Calver

Faster, easier calving with strong calves

Tub Easi-Calver + Fly

Tub Easi-Calver with the reduction of fly nuisance

Tub Coxi-Clear Calf

Effective solution for coccidiosis in suckler & dairy calves

Tub Suckler Licking Stone

Helps promote fertility, condition and forage digestion in suckler cows

Tub Calf & Breathezee

Supports respiratory health

Tub Beef Finisher

Boosting energy & daily weight gains for a quicker finishing

Feed

Liquid

Our fully formulated liquid feed is an ideal addition to improve rumen efficiency by stimulating microbial reproduction unlocking the potential of the ration, particularly the forages. Utilising the most cost effective feed to create the most economic option.

Our extensive liquid feeding equipment offers a practical solution to fit every situation.

Blocks and Buckets

An easy, low labour feed to buffer grazing and rations. Adds essential protein, energy and micronutrients for a one stop balancing option.

Our range of liquid feed, blocks and buckets nutritionally target the following issues...

Forage Boosting

Improve rumen efficiency to make the most of forage based diets

Protein Targeting

Match protein to maximise production by balancing the ration

Energy Targeting

A concentrated energy boost at times of need

Magnesium Cover

A palatable source of magnesium to cover staggers

Palatability Enhancers

Ration addition to reduce dust and enhance intakes

Calving Relief

Designed to aid ease of calving while reducing risk of milk fever

Lambing Relief

Formulated to reduce lambing related issues and aid the ease of lambing

Protein Concentrates

An economic way of adding feed value to home mixed rations for sheep & cattle.

MasterFeed Range

All natural proteins to maximise development of non-ruminating youngstock for a lifetime of potential

MasterBlend Range

A balanced combination of by-pass protein and urea from 50-100% total protein composition

-  Aimed at enhancing the rumen output to make the most of a ration
-  A range of energy densities to target production levels
-  Yeast option to further elevate rumen health and efficiency
-  Fully mineralised to eliminate the need for further additions

Aquatrace

Concentrated micronutrient and problem solving applications aiming to boost animal health and performance

Sheep

Ex-Sel Advance Topping

Encourage energy metabolism at time of flushing while maintaining and elevating overall health

Ex-Sel Advance Lambing

Promotes birth of healthy, lively newborn lambs, helps when grazing on brassicas

Ex-Sel Advance Weaning

Premium drench boosting lamb performance at weaning. Will help reduce stress and any recovery from illness

Footbath Solution

Effective hoof care health for all stock

Stockbooster Drench

Multi-purpose drench for copper sensitive stock

SHO Antiseptic Spray

Skin, hoof & oral cleansing spray

Cattle

Cow Capsules

Single-dose trace element capsules for all cows

Grazing Capsules

Single-dose trace element capsules for grazing cattle

Ex-Sel Cow & Calf Advance

Premium micro-nutrition drench for cattle. Use for a boost at calving or weaning

Nemlic

Liquid feed wormer for cattle

Calf Capsules & Crypto Capsules

Newborn calf protection against digestive upsets

5 in 1 Calf Paste

Premium newborn calf protection paste

Water Soluble Tablets

Administer trace elements via drinking water (5 different formulations)

Acetona Liquid

Unique ingredient to combat ketosis and aid the prevention of twin lamb disease

Prosolve

The specialised problem solving range for top dressing and mixing in-feed

Sheep

Hoof Care Sheep

Targeted hoof hardening formula with zinc & biotin

Cattle

Cattle Conditioner

Promotes a healthy appearance in cattle

Breathezee

Supporting a healthy respiratory system in cattle for a lifetime of performance

Udder & Hoof Care

Reduces cell counts & hardens hooves with biotin

Quick Serve

Improves fertility & tightens the calving period

Pre-Calver Omega 3

Conditions and prepares all pre-calving cows

Crina Nutripak

Improves feed efficiency to increase cattle and sheep milk yield and growth

Sheep & Cattle

Acetona Meal

Cleansing the liver to reduce ketosis risk

Yeast-Ex Nutripak

Proven digestion enhancer for all stock

Thrivon Omega 3

Show conditioner for bloom & sheen

For support on all Brinicombe Agri products

Sheep & Cattle

Aquamag

A palatable magnesium supply through addition into drinking water

Minerals

A full range of mineral solutions formulated to balance rations and grazing, targeted at production requirements. Our loose bagged minerals are of a granular form to reduce dust, improve flow capability and perform as a free-access or in-feed option. Our molassed mineral buckets allow a low labour option ideally suited to grazing. We use high quality mineral ingredients to improve the availability to the animal, to best utilise the included essential nutrients.

Our range nutritionally targets:

- Improved fertility for ewes and cows
- Magnesium sources for reduction of staggers
- Calving for the well-being of the calf and cow
- Lambing support to the ewe and lamb
- Lactation to drive yield
- Growing stock to build frame and bulk
- Lameness by improved hoof condition
- Overall balance of mineral shortfalls in forage based diets
- Respiratory support to decrease stress and maximise production
- Certified products for organic use

Crop Preservatives

We have a range of bacterial inoculants and crimping additives to suit a variety of grain and forage preservation, reducing waste and maximizing nutrient retention. Our Biophage inoculants use elite bacterial strains to drop the pH more quickly than untreated silage, reducing the loss of energy, true protein & dry-matter.

Our crimping additives allow protection of high moisture grains, making available a high protein feed while ensuring optimum crop yields.

Forage

Biophage Maize

Biological maize silage preservative

Biophage Wholecrop

Biological wholecrop silage preservative

Biophage X

Pre-activating & doubling strength for an economic preservative of grass silage

Biophage Gold

Preservative for higher dry-matter grass silage

Ultra Crop

Aiding the prevention of mould and yeast in high dry-matter silage

Ultra Crop Extra

Ultra Crop with additional bacterial control, formulated for bail silage for sheep

Crimping

Biophage Crimp

Biological crimping preservative for all crop types

Cornstile

Crimping additive to preserve grain

Graintona

Crimping additive to preserve grain & protect protein

Do you need technical support?

Speak to the mineral clinic™

The Mineral Clinic's highly trained FAR registered advisors, backed up by the technical department are on hand to answer freephone queries on all manner of on-farm ruminant issues.

Freephone 0800 374 325

enquiries@brinicombe.co.uk

Do you need a bespoke solution?

Try our mySolve service

Our team of nutritionists are here to advise on your unique situation. By evaluating your feeds and target requirements we can balance the inputs to suit your enterprise; ensuring optimal production is achieved. We formulate, manufacture and deliver your nutritionally engineered product.

Organic?

We offer organic products within our ranges and can advise on how our products comply to organic standards.

brinicombe agri

If you are a new customer and you would like find out more information on our products and how they can improve your livestock enterprise please contact the Mineral Clinic on 0800 374 325 or contact your local Territory Sales Manager to arrange an on farm consultation.
